CULTURE-UREAPLASMA UREAL- MYCOPLASMA-Hominis; isolation and identification

Test Code: UUREA

Specimen Type:

Tube Type / Collection Container: Mycoplasma Multi Microbe Medium

Specimen Volume:

Specimen Handling:

Specimen Storage: Refrigerate 2-8 C

Specimen Collection Notes: Use special collection kit (LabCorp media) and after collection remove cap from transport media tube and insert swab aseptically into transport tube, mix vigorously in the medium. Break off swab shaft enough so that it will not interfere with closing the cap and to prevent tube leakage in transport. Transport refrigerated to lab within 24hrs. / Specify source/origin of collection.

Department: Reference Laboratory

Reference Lab Code: 086884
