HPV High Risk (HPV DNA)

Test Code: MISC

Specimen Type: Swab OR Liquid-Based Pap Test

Tube Type / Collection Container: Digene HC2 DNA Collection Device
OR ThinPrep Pap Test Vial (please do not send both).

Specimen Volume: 1 Digene Swab OR 1 ThinPrep Pap Test vial (should contain at least 4ml preservative fluid following cytology processing).

Specimen Storage: Digene HC2 DNA Collection Device: viable at room temperature for up to 2 weeks/refrigerated for up to 3 weeks. ThinPrep Pap Test Vial: viable at room temperature for up to 3 months.

Specimen Collection Notes: If Pap specimen is collected, please do not collect additional material with the Digene swab for HPV testing (Pap material is used after cytology processing for HPV testing); if a Pap specimen is not collected, please use the Digene HC2.

Department: Reference Laboratory

Reference Lab Code: 507301
