

Important Information for After Your One-Day Surgery

For your health and safety, please follow these instructions following your One-Day Surgery:

- Plan to rest for 24 hours after your surgery. Do not schedule any activities for the day of your surgery.
- You cannot be alone for 24 hours after receiving general anesthesia. Take someone with you if you must go outside. Do not go out alone.
- Move slowly, particularly when you rise to a sitting or standing position.
- Do not drive or operate machinery – not even a lawn mower – for the first 24 hours and until your doctor approves.
- Follow all of the post-operative instructions you received at the hospital.

If you have questions about these instructions, please call your doctor.
